Skills

HTML

The HyperText Markup Language or HTML is the standard markup language for documents designed to be displayed in a web browser.

CSS

Cascading Style Sheets is a style sheet language used for describing the presentation of a document written in a markup language such as HTML or XML.

JS

JavaScript, often abbreviated to JS, is a programming language that is one of the core technologies of the World Wide Web, alongside HTML and CSS.

About

Hey there! I'm Anurag Singh, a Developer, specializing on JavaScript. I have some work experience from a few internships and completed some projects. I like to collaborate on projects

About

Hey there! I'm Anurag Singh, a Developer, specializing on JavaScript. I have some work experience from a few internships and completed some projects. I like to collaborate on projects and learn more about programming languages. I have completed five-courses, developed by Google, that include hands-on, practice-based assessments and are designed to prepare them for entry-level roles in IT support. They are competent in foundational skills, including troubleshooting and customer service, networking, operating systems, system administration, and security.

Azure Technology used:

The screenshot displays the Microsoft Azure portal interface. The browser's address bar shows the URL: `portal.azure.com/#@ramanurag2223gmail.onmicrosoft.com/resource/subscriptions/129a761c-9764-4fa5-bac0-c0f51c7eb463/resourceGroups/...`. The page title is "myfrtproject | Static website". On the left, a navigation pane lists various Azure services, with "Static website" selected under the "Data management" section. The main content area shows the configuration for the static website. It includes a description: "Enabling static websites on the blob service allows you to host static content. Webpages may include static content and client-side scripts. Server-side scripting is not supported. As data is replicated asynchronously from primary to secondary regions, files at the secondary endpoint may not be immediately available or in sync with files at the primary endpoint. [Learn more](#)". Below this, the "Static website" toggle is set to "Enabled". A message states: "An Azure Storage container has been created to host your static website. [\\$web](#)". The configuration fields are as follows:

- Primary endpoint: `https://myfrtproject.z29.web.core.windows.net/`
- Secondary endpoint: `https://myfrtproject-secondary.z29.web.core.windows.net/`
- Index document name: `index.html`
- Error document path: `error.html`

A yellow box with the text "Static website" is overlaid on the right side of the configuration area. The Windows taskbar at the bottom shows the time as 01:34 AM on 07-07-2023.

Container

The screenshot displays the Microsoft Azure portal interface. The top navigation bar shows the 'myfrtproject - Microsoft Azure' tab. The main header indicates the current page is 'Containers' for the 'myfrtproject' storage account. A left-hand sidebar lists various Azure services, with 'Containers' highlighted under the 'Data storage' section. The main content area features a search bar for containers and a table listing existing containers.

Search containers by prefix ☐ Show deleted containers
